ABOUT US

Viva la Vida means, literally, Live the Life, or The Good Life. Our foundation was formed by a committed group of farmers and students of Rudolf Steiner's Spiritual Science with a commitment to "Heal the Earth." Through seminars and trainings, we are learning to implement the methodology taught us by Enzo Nastati from Eureka Institute in Italy. Now we are passing on what we have learned to others. We are the sole distributor in North America of the Widdar line of homeodynamic products produced by Eureka Institute.

Viva la Vida is conducting on-going research trials in the USA using the Widdar products to remediate soils from salts, to increase fertility and humus-building capacity of soils, and to enhance the vitality and productivity of our plants and animals. We are also breeding new plants capable of meeting the evolutionary demands of our modern times.

OUR HISTORY

Beginning in 2013, a group of Colorado farmers invited Enzo Nastati to teach a seminar on "How to Make Biodynamics Work Better." This was followed by four more seminars on agriculture, depollution, and architecture. We realized the need and potential for a School of Spiritual Agriculture and we committed to support that eventual goal. Our first step was to form a non-profit 501(c)(3) organization in February 2015. Hence, **Viva la Vida** was born.

MEMBERSHIP BENEFITS *A one-year \$50 membership includes:*

- » Exclusive access to Homeodynamic preparations, books, devices, etc.
- » Seasonal gatherings with talks and demonstrations about Homeodynamic methods for farming, depollution, education, architecture and community building
- » Discount on select Viva la Vida events in collaboration with other groups
- » Quarterly newsletter which includes articles, trial results, and events

WHAT WE OFFER

Viva la Vida Foundation supports farmers and gardeners in the use of Homeodynamic products and principles for the development of an agricultural organism which increases vitality and production. We offer hands-on workshops and in-depth seminars to teach skills to recognize and understand the underlying principles for developing a healthy environment. With the support of Eureka Institute, we provide consulting and design of buildings and farms and gardens. We place specific emphasis on the qualitative improvement of the environment, the re-balancing and harmonization of existing buildings, and technical advice for new construction techniques to enhance health.

GET INVOLVED! *Join a committee and help:*

- » Conduct research trials; Publish our results
- » Organizational development; Fundraising
